REVIEW

1 **Codon Usage in Higher Plants, Green Algae, and Cyanobacteria**—Wilbur H. Campbell* and G. Gowri

ARTICLES

12 **Comparison of Lodging Safety Factor of Untreated and Succinic Acid 2,2-Dimethylhydrazide-Treated Shoots of Mulberry Tree**—Masaki Tateno* and Kaesun Bae

17 **Accumulation of Apoplastic Iron in Plant Roots. A Factor in the Resistance of Soybeans to Iron-Deficiency Induced Chlorosis?**—Nancy Longnecker* and Ross M. Welch

23 **Patch Clamp Studies on Root Cell Vacuoles of a Salt-Tolerant and a Salt-Sensitive *Plantago* Species. Regulation of Channel Activity by Salt Stress**—Frans J. M. Maathuis* and Hidde B. Prins

29 **Leaf Phosphate Status, Photosynthesis, and Carbon Partitioning in Sugar Beet. III. Diurnal Changes in Carbon Partitioning and Carbon Export**—I. Madhusudana Rao, Arthur L. Fredeen, and Norman Terry*

37 **Spinach Chloroplastic Carbonic Anhydrase. Nucleotide Sequence Analysis of cDNA**—James N. Burnell*, Mark J. Gibbs, and John G. Mason

41 **Properties and Activity Changes of Chlorogenic Acid:Glucaric Acid Caffeoyltransferase from Tomato (*Lycopersicon esculentum*)**—Dieter Strack* and Wiltrud Gross

48 **Characterization of Abscisic Acid-Induced Ethylene Production in Citrus Leaf and Tomato Fruit Tissues**—Joseph Riov, Eliahu Dagan, Raphael Goren*, and Shang Fa Yang

54 **Ethylene-Enhanced Catabolism of [^{14}C]Indole-3-Acetic Acid to Indole-3-Carboxylic Acid in Citrus Leaf Tissues**—Oded Sagee, Joseph Riov, and Raphael Goren*

61 **Direct Observation of Cell Wall Structure in Living Plant Tissues by Solid-State ^{13}C NMR Spectroscopy**—Michael C. Jarvis* and David C. Apperley

66 **Kinetic and Structural Properties of NADP-Malic Enzyme from Sugarcane Leaves**—Alberto A. Iglesias* and Carlos S. Andreo

73 **Purification and Characterization of Acetyl-CoA Carboxylase from the Diatom *Cyclotella cryptica***—Paul G. Roessler

79 **Estimation of Carbon and Nitrogen Allocation during Stalk Elongation by ^{13}C and ^{15}N Tracing in *Zea mays* L.**—Jean-Bernard Cliquet*, Eliane Deléens, Agnès Bousser, Michel Martin, Jean-Charles Lescure, Jean-Louis Prioul, André Mariotti, and Jean-François Morot-Gaudry

88 **Identification of the Large Subunit of Ribulose 1,5-Bisphosphate Carboxylase/Oxygenase as a Substrate for Transglutaminase in *Medicago sativa* L. (Alfalfa)**—Stephen A. Margosiak, Abdi Dharma, Megan R. Bruce-Carver, Andrea P. Gonzales, Donna Louie, and Glenn D. Kuehn*

97 **Inhibition of Loading of ^{14}C Assimilates by *p*-Chloromercuribenzenesulfonic Acid. Localization of the Apoplastic Pathway in *Vicia faba***—Sophie Bourquin, Jean-Louis Bonnemain*, and Serge Delrot

103 **Leaf Cuticles Behave as Asymmetric Membranes. Evidence from the Measurement of Diffusion Potentials**—Melvin T. Tyree*, Timothy D. Scherbatskoy, and Christopher A. Tabor

110 **A Novel Role for Light in the Activation of Ribulosebisphosphate Carboxylase/Oxygenase**—William J. Campbell and William L. Ogren*

116 **Chrysoeriol and Luteolin Released from Alfalfa Seeds Induce *nod* Genes in *Rhizobium meliloti***—Ueli A. Hartwig, Carl A. Maxwell, Cecillia M. Joseph, and Donald A. Phillips*

123 **Amino Acid Transport across the Tonoplast of Vacuoles Isolated from Barley Mesophyll Protoplasts. Uptake of Alanine, Leucine, and Glutamine**—Karl-Joseph Dietz*, Renate Jäger, Georg Kaiser, and Enrico Martinoia

130 **Carbon Isotope Discrimination in Coffee Genotypes Grown under Limited Water Supply**—Frederick C. Meinzer*, Guillermo Goldstein, and David A. Grantz

136 **Variations in the Levels of Chloroplast tRNAs and Aminoacyl-tRNA Synthetases in Senescing Leaves of *Phaseolus vulgaris***—Chelliah Jayabaskaran, Marcel Kuntz, Pierre Guillemaut, and Jacques-Henry Weil*

141 **Field Study of the Interaction between Solar Ultraviolet-B Radiation and Drought on Photosynthesis and Growth in Soybean**—Joe H. Sullivan* and Alan H. Teramura

147 **Activation of O_2 Uptake and NAD-Specific Isocitrate Dehydrogenase in Mitochondria Isolated from Cotyledons of Castor Bean by *cis,trans*-Abscisic Acid**—Takafumi Tezuka*, Yukio Yamamoto, and Noriaki Kondo

151 **Energy Requirement for the Import of Protein into Plastids from Developing Endosperm of *Ricinus communis* L.**—Sheila A. Boyle, Sean M. Hemmingsen, and David T. Dennis*

155 **Characterization of ATP-Dependent Fructose 6-Phosphate 1-Phosphotransferase Isozymes from Leaf and Endosperm Tissues of *Ricinus communis***—Vicki L. Knowles, Maureen F. Greyson, and David T. Dennis*

* Author to whom correspondence should be addressed.

160 **Nitrogen-Induced Changes in the Growth and Metabolism of Developing Maize Kernels Grown *in Vitro*—**George W. Singletary and Frederick E. Below*

168 **Developmental Transition from Enzymatic to Acid Hydrolysis of Sucrose in Acid Limes (*Citrus aurantifolia*)—**Ed Echeverria

172 **Regulation of 5-Aminolevulinic Acid (ALA) Synthesis in Developing Chloroplasts. III. Evidence for Functional Heterogeneity of the ALA Pool—**Laiqiang Huang and Paul A. Castelfranco*

179 **Characterization of a Rapid, Blue Light-Mediated Change in Detectable Phosphorylation of a Plasma Membrane Protein from Etiolated Pea (*Pisum sativum* L.) Seedlings—**Timothy W. Short* and Winslow R. Briggs

186 **Inheritance of the Reversal of O_2 Response of Photosynthesis in a *Flaveria linearis* Mutant—**Joseph H. Bouton, R. Harold Brown*, George T. Byrd, and Thomas D. Sharkey

191 **New Methods for Extraction and Quantitation of Zeins Reveal a High Content of γ-Zein in Modified *opaque-2* Maize—**John C. Wallace, Mauricio A. Lopes, Edilson Paiva, and Brian A. Larkins*

197 **Solubilization of Covalently Bound Extensin from *Capsicum* Cell Walls—**Karen J. Biggs and Stephen C. Fry*

205 **Water Deficit and Abscisic Acid Cause Differential Inhibition of Shoot *versus* Root Growth in Soybean Seedlings. Analysis of Growth, Sugar Accumulation, and Gene Expression—**Robert A. Creelman*, Hugh S. Mason, Robert J. Bensen, John S. Boyer, and John E. Mullet

215 **Involvement of Plasma Membrane Calcium Influx in Bacterial Induction of the K^+/H^+ and Hypersensitive Responses in Tobacco—**Merelee M. Atkinson*, L. Dale Keppler, Elizabeth W. Orlandi, C. Jacyn Baker, and Charles F. Mischke

222 **Free Amino Acid Composition of Leaf Exudates and Phloem Sap. A Comparative Study in Oats and Barley—**Jens Weibull*, Fredrik Ronquist, and Sture Brishammar

227 **Effect of Ethephon on Protein Degradation and the Accumulation of 'Pathogenesis-Related' (PR) Proteins in Tomato Leaf Discs—**Pablo Vera* and Vicente Conejero

234 **Selective Measurement of Starch Synthesizing Enzymes in Permeabilized Potato Tuber Slices—**Anne S. Ponstein*, Greetje H. Vos-Scheperkeuter, Evert Jacobsen, Will J. Feenstra, and Bernard Witholt

242 **Gibberellic Acid Regulates Cell Wall Extensibility in Wheat (*Triticum aestivum* L.)—**Geoff Keyes*, Mark E. Sorrells, and Tim L. Setter

246 **Rubisco Activity in Guard Cells Compared with the Solute Requirement for Stomatal Opening—**Udo Reckmann, Renate Scheibe, and Klaus Raschke*

254 **Membrane Composition and Physiological Activity of Plastids from an *Oenothera* Plastome Mutator-Induced Chloroplast Mutant—**Ellen M. Johnson and Barbara B. Sears*

COMMUNICATIONS

262 **Binding of Isolated Plant Lectin by Rhizobia during Episodes of Reduced Gravity Obtained by Parabolic Flight—**Ralph L. Henry, Pat D. Green, Peter P. Wong, and James A. Guikema*

265 **A Squared Michaelis-Menten Function of Substrate Concentration for Plant Mitochondrial Respiration—**Alan T. James, Joseph T. Wiskich*, and Ian B. Dry

268 **Nitrogenase Activity and Nodule Gas Permeability Response to Rhizospheric NH_3 in Soybean—**Larry C. Purcell and Thomas R. Sinclair*

273 **Polymorphism of a Photosystem I Subunit Caused by Alloploidy in *Nicotiana*—**Junichi Obokata*, Kohki Mikami, Nobuaki Hayashida, and Masahiro Sugiura

276 **Differential Activation of Expression of a Suberization-Associated Anionic Peroxidase Gene in Near-Isogenic Resistant and Susceptible Tomato Lines by Elicitors of *Verticillum albo-atrum*—**Royce Mohan and Pappachan E. Kolattukudy*

Number 2. February

REVIEW

281 **Crown Gall Disease and Hairy Root Disease. A Sledgehammer and a Tackhammer—**Stanton B. Gelvin

ARTICLES

286 **Nitrate Reduction in Response to CO_2-Limited Photosynthesis. Relationship to Carbohydrate Supply and Nitrate Reductase Activity in Maize Seedlings—**Gary M. Pace*, Richard J. Volk, and William A. Jackson

293 **Inhibition of Zeaxanthin Formation and of Rapid Changes in Radiationless Energy Dissipation by Dithiothreitol in Spinach Leaves and Chloroplasts—**Barbara Demmig-Adams*, William W. Adams III, Ulrich Heber, Spidola Neimanis, Klaus Winter, Almuth Krüger, Franz-Christian Czygan, Wolfgang Bilger, and Olle Björkman

302 **Relative Contributions of Zeaxanthin-Related and Zeaxanthin-Unrelated Types of 'High-Energy-State' Quenching of Chlorophyll Fluorescence in Spinach Leaves Exposed to Various Environmental Conditions—**William W. Adams III*, Barbara Demmig-Adams, and Klaus Winter

310 **Inducing Gravitropic Curvature of Primary Roots of *Zea mays* cv Ageotropic—**Randy Moore*, Michael

L. Evans, and W. Mark Fondren

316 **Structure of the Threonine-Rich Extensin from *Zea mays*—**Marcia J. Kieliszewski*, Joseph F. Leykam, and Derek T. A. Lamport

327 **A Chenopod Extensin Lacks Repetitive Tetrahydroxyproline Blocks—**Xiong-biao Li, Marcia J. Kieliszewski, and Derek T. A. Lamport*

334 **Transient Gene Expression in Maize, Rice, and Wheat Cells Using an Airgun Apparatus—**James H. Oard*, David F. Paige, John A. Simmonds, and Thomas M. Gradziel

340 **Solubilization and Reconstitution of the Oat Root Vacuolar H^+/Ca^{2+} Exchanger—**Karen S. Schumaker* and Heven Sze

346 **Developmental Regulation of Enzymes of Sucrose and Hexose Metabolism in Effective and Ineffective Soybean Nodules—**Gordon E. Anthon and David W. Emerich*

352 **Further Studies on O_2-Resistant Photosynthesis and Photorespiration in a Tobacco Mutant with Enhanced Catalase Activity—**Israel Zelitch

358 **Differentiation between Phycobiliprotein and Colorless Linker Polypeptides by Fluorescence in the Presence of $ZnSO_4$—**Shirley Raps

363 **Purification and Thermal Dependence of Glutathione Reductase from Two Forage Legume Species—**Saranga P. Kidambi, James R. Mahan*, and Arthur G. Matches

368 ***Rhizobium meliloti* Exopolysaccharide Mutants Elicit Feedback Regulation of Nodule Formation in Alfalfa—**Gustavo Caetano-Anollés, Antonio Lagares, and Wolfgang D. Bauer*

375 **The Distribution of Catalase Activity, Isozyme Protein, and Transcript in the Tissues of the Developing Maize Seedling—**Margaret G. Redinbaugh, Mara Sabre, and John G. Scandalios*

381 **Characteristics of the Inhibition of Potato (*Solanum tuberosum*) Invertase by an Endogenous Proteinaceous Inhibitor in Potatoes—**Geracimo E. Bracho and John R. Whitaker*

386 **Purification and Partial Characterization of Potato (*Solanum tuberosum*) Invertase and Its Endogenous Proteinaceous Inhibitor—**Geracimo E. Bracho and John R. Whitaker*

395 **Immunological Characterization of *in Vitro* Forms of Homoserine Dehydrogenase from Carrot Suspension Cultures—**Frank J. Turano, Ramon L. Jordan, and Benjamin F. Matthews*

401 **The Anaerobic Response of Soybean—**Douglas A. Russell, Daphne M.-L. Wong, and Martin M. Sachs*

408 **Photosynthetic Potential and Accumulation of Assimilates in the Developing Chloroembryos of *Cyamopsis tetragonoloba* (L.) Taub—**P. Kaladharan and M. Vivekanandan*

413 **Inhibition of Cell Wall-Associated Enzymes *in Vitro* and *in Vivo* with Sugar Analogs—**Gerald Nagahashi*, Shu-I Tu, George Fleet, and Sun K. Namgoong

419 **Accumulation of Chlorophyll *a*/*b*-Binding Polypeptides in *Chlamydomonas reinhardtii y-1* in the Light or Dark at 38°C. Evidence for Proteolytic Control—**J. Kenneth Hoober*, Margaret A. Maloney, Linda R. Asbury, and Dawn B. Marks

427 **Changes in the Composition and Synthesis of Proteins in Cellular Membranes of *Echinochloa crus-galli* (L). Beauv. Seeds during the Transition from Dormancy to Germination—**Liliana Di Nola*, Charles F. Mischke, and Ray B. Taylorson

434 **Intact Plastids Are Required for Nitrate- and Light-Induced Accumulation of Nitrate Reductase Activity and mRNA in Squash Cotyledons—**Rolf Oelmüller and Winslow R. Briggs*

440 **Stress Responses in Alfalfa (*Medicago sativa* L.). I. Induction of Phenylpropanoid Biosynthesis and Hydrolytic Enzymes in Elicitor-Treated Cell Suspension Cultures—**Karen Dalkin, Robert Edwards, Brent Edington, and Richard A. Dixon*

447 **Stress Responses in Alfalfa (*Medicago sativa* L.). II. Purification, Characterization, and Induction of Phenylalanine Ammonia-Lyase Isoforms from Elicitor-Treated Cell Suspension Cultures—**Jesus Jorrin and Richard A. Dixon*

456 **Inhibition of Phospho*enol*pyruvate Carboxylase by Malate—**Randolph T. Wedding*, M. Kay Black, and Christopher R. Meyer

462 **Effect of Polyethylene Glycol Exclusion on the Water Potential of Solution-Saturated Filter Paper—**Stuart P. Hardegree and William E. Emmerich

467 **Induction of Glutathione *S*-Transferase Isozymes in Sorghum by Herbicide Antidotes—**John V. Dean, John W. Gronwald*, and Charlotte V. Eberlein

474 **Developmental Staging of Maize Microspores Reveals a Transition in Developing Microspore Proteins—**Patricia A. Bedinger* and Michael D. Edgerton

480 **Transient Responses of Nitrogenase to Acetylene and Oxygen in Actinorhizal Nodules and Cultured *Frankia*—**Warwick B. Silvester and Lawrence J. Winship*

487 **Photoinhibition in *Vitis californica*. The Role of Temperature during High-Light Treatment—**John A. Gamon* and Robert W. Pearcy

495 **Two Distinct Blue-Light Responses Regulate Epicotyl Elongation in Pea—**Katherine M. F. Warpeha and Lon S. Kaufman*

500 **Chloramphenicol Acetyl Transferase (CAT) Protein is Expressed in Transgenic Tobacco in Field Tests following Attack by Insects—**Robert W. Thornburg*, Andrea Kernan, and Lisa Molin

506 **Heat Shock Inhibits α-Amylase Synthesis in Barley Aleurone without Inhibiting the Activity of Endoplasmic Reticulum Marker Enzymes—**Liliane Sticher, Asok K. Biswas, Douglas S. Bush, and Russell L. Jones*

514 **Photoinhibition Resistance in the Red Alga *Porphyra perforata*. The Role of Photoinhibition Repair—**Stephen K. Herbert

520 **Tobacco Mesophyll Protoplasts Synthesize 1,3-β-Glucanase, Chitinases and "Osmotins" during *in Vitro* Culture—**Jean Grosset, Yves Meyer*, Yvette Chartier, Serge Kauffmann, Michel Legrand, and Bernard Fritig

COMMUNICATIONS

528 **Potential Importance of Metal-Ligand Interactions in Enzyme Assays Demonstrated with the Assay Cocktail for Phospho*enol*pyruvate Carboxylase**—William H. Outlaw, Jr.

531 **Circadian Rhythm of the Prokaryote *Synechococcus* sp. RF-1**—Tan-Chi Huang*, Jenn Tu, Te-Jin Chow, and Tsung-Hsien Chen

534 **Carbon Isotope Discrimination Varies Genetically in C_4 Species**—Kerry T. Hubick*, Graeme L. Hammer, Graham D. Farquhar, Len J. Wade, Susanne von Caemmerer, and Sally A. Henderson

538 **Globulin Gene Expression in Embryos of Maize *viviparous* Mutants. Evidence for Regulation of the *Glb1* Gene by Abscisic Acid**—Alan L. Kriz*, Mark S. Wallace, and Renato Paiva

543 **A Two-Dimensional Vibrating Probe Study of Currents around Lateral Roots of *Raphanus sativus* Developing in Culture**—Keerti S. Rathore*, Kevin B. Hotary, and Kenneth R. Robinson

547 **Polyamine Levels and Tomato Fruit Development: Possible Interaction with Ethylene**—Robert A. Saftner* and Bruce G. Baldi

Number 3. March

ARTICLES

551 **Violaxanthin Is an Abscisic Acid Precursor in Water-Stressed Dark-Grown Bean Leaves**—Yi Li and Daniel C. Walton*

560 **Emission of Volatile Sulfur Compounds from Spruce Trees**—Heinz Rennenberg*, Beate Huber, Peter Schröder, Klaus Stahl, Werner Haunold, Hans-Walter Georgii, Stefan Slovik, and Hardy Pfanz

565 **Cytokinins and Flower Bud Formation *in Vitro* in Tobacco. Role of the Metabolites**—Wim M. Van der Krieken, Anton F. Croes*, Marinus J. M. Smulders, and George J. Wullems

570 **Phycobilisome Heterogeneity in the Red Alga *Porphyra umbilicalis***—Patricia Algarra*, Jean-Claude Thomas, and Anne Mousseau

577 **Short-Term Effects of γ-Irradiation on 1-Aminocyclopropane-1-Carboxylic Acid Metabolism in Early Climacteric Cherry Tomatoes. Comparison with Wounding**—Christian Larrigaudière, Alain Latché, Jean Claude Pech, and Christian Triantaphylidès*

582 **Effects of the Developmental State of the Tissue on the Competence for Flower Bud Regeneration in Pedicel Explants of Tobacco**—Marinus J. M. Smulders, Eric J. W. Visser, Wim M. Van der Krieken, Anton F. Croes*, and George J. Wullems

587 **Purification and Characterization of Aspartate Aminotransferase Isoenzymes from Carrot Suspension Cultures**—Frank J. Turano, Barbara J. Wilson, and Benjamin F. Matthews*

595 **Nitrogen Fixation (C_2H_2 Reduction) by Broad Bean (*Vicia faba* L.) Nodules and Bacteroids under Water-Restricted Conditions**—Vincent Guerin, Jean-Charles Trinchant, and Jean Rigaud*

602 **Foliar Boron Applications Increase the Final Number of Branches and Pods on Branches of Field-Grown Soybeans**—Mary K. Schon and Dale G. Blevins*

608 **Effects of Water Vapor Pressure Deficit on Photochemical and Fluorescence Yields in Tobacco Leaf Tissue**—Richard B. Peterson

614 **Purification and Characterization of Pea Epicotyl β-Amylase**—Pauline A. Lizotte, Cynthia A. Henson*, and Stanley H. Duke

621 **Two Systems for Concentrating CO_2 and Bicarbonate during Photosynthesis by *Scenedesmus***—Jens Thielmann, N. Edward Tolbert*, Arun Goyal, and Horst Senger

630 **Salicylhydroxamic Acid (SHAM) Inhibition of the Dissolved Inorganic Carbon Concentrating Process in Unicellular Green Algae**—Arun Goyal* and N. Edward Tolbert

637 **Subcellular Compartmentation of Uridine Nucleotides and Nucleoside-5′-Diphosphate Kinase in Leaves**—Jane Dancer, H. Ekkehard Neuhaus, and Mark Stitt*

642 **The Tomato Fruit Cell Wall. II. Polyuronide Metabolsim in a Nonsoftening Tomato Mutant**—James L. Koch and Donald J. Nevins*

648 **Photosynthetic Decline from High Temperature Stress during Maturation of Wheat. I. Interaction with Senescence Processes**—Scott A. Harding, James A. Guikema, and Gary M. Paulsen*

654 **Photosynthetic Decline from High Temperature Stress during Maturation of Wheat. II. Interaction with Source and Sink Processes**—Scott A. Harding, James A. Guikema, and Gary M. Paulsen*

659 **Biochemical and Immunological Characterization of Nitrate Reductase Deficient *nia* Mutants of *Nicotiana plumbaginifolia***—Isabelle Chérel*, Martine Gonneau, Christian Meyer, Frédérique Pelsy, and Michel Caboche

666 **Cryopreservation of Rye Protoplasts by Vitrification**—Robert Langis and Peter L. Steponkus*

672 **Evidence for and Subcellular Localization of a Ca-Stimulated Phospholipase D from Maize Roots**—David Brauer*, Edwin Nungesser, Robert J. Maxwell, Carol Schubert, and Shu-I Tu

679 **Purification and Partial Characterization of a Fructanase which Hydrolyzes Natural Polysaccharides from Sugarcane Juice**—M. Estrella Legaz*, Luisa Martin, Mercedes M. Pedrosa, Carlos Vicente, Roberto de Armas, Maritza Martínez, Isabel Medina, and Carlos W. Rodriguez

684 **On The Regulation of Spinach Nitrate Reductase**—Juan Sanchez* and Hans W. Heldt

690 **Spermidine Uptake by Mitochondria of *Helianthus tuberosus***—Rossella Pistocchi, Fabiana Antognoni, Nello Bagni, and Davide Zannoni*

696 **Senescence and Stomatal Aperture as Affected by Antibiotics in Darkness and Light**—Jonathon Park and Kenneth V. Thimann*

703 **Characterization of α-Amylase-Inhibitor, a Lectin-Like Protein in the Seeds of *Phaseolus vulgaris***—Joaquin Moreno, Teresa Altabella, and Maarten J. Chrispeels*

710 **Purification by Immunoadsorption and Immunochemical Properties of NADP-Dependent Malic Enzymes from Leaves of C_3, C_4, and Crassulacean Acid Metabolism Plants**—Marion Fathi and Claus Schnarrenberger*

718 **The Formation and Distribution of Ice within Forsythia Flower Buds**—Edward N. Ashworth

726 **Effects of the Fungal Endophyte *Acremonium coenophialum* on Nitrogen Accumulation and Metabolism in Tall Fescue**—Philip C. Lyons, John J. Evans, and Charles W. Bacon*

733 **Correlation between the Maintenance of Photosynthesis and *in Situ* Protoplast Volume at Low Water Potentials in Droughted Wheat**—Mane Santakumari and Gerald A. Berkowitz*

740 **Ubiquitin Pool Modulation and Protein Degradation in Wheat Roots during High Temperature Stress**—David L. Ferguson, James A. Guikema, and Gary M. Paulsen*

747 **Further Characterization of the Red Beet Plasma Membrane Ca^{2+}-ATPase Using GTP as an Alternative Substrate**—Lorraine E. Williams, Sherry B. Schueler, and Donald P. Briskin*

755 **Respiration and Alternative Oxidase in Corn Seedling Tissues during Germination at Different Temperatures**—Cecil R. Stewart*, Barry A. Martin, Linda Reding, and Sharon Cerwick

761 **Seedling Growth, Mitochondrial Characteristics, and Alternative Respiratory Capacity of Corn Genotypes Differing in Cold Tolerance**—Cecil R. Stewart*, Barry A. Martin, Linda Reding, and Sharon Cerwick

767 **Fructan Precipitation from a Water/Ethanol Extract of Oats and Barley**—David P. Livingston III

770 **Effect of Light Quality and Vernalization on Late-Flowering Mutants of *Arabidopsis thaliana***—Jose M. Martinez-Zapater and Chris R. Somerville*

777 **Uptake and Metabolism of Clomazone in Tolerant-Soybean and Susceptible-Cotton Photomixotrophic Cell Suspension Cultures**—Michael A. Norman*, Rex A. Liebl, and Jack M. Widholm

785 **Differential Regulation of Maize Homoserine Dehydrogenase under Physiological Conditions**—John K. Bryan

792 **Correlations between Gravitropic Curvature and Auxin Movement across Gravistimulated Roots of *Zea mays***—Linda M. Young, Michael L. Evans*, and Rainer Hertel

797 **Xylem-to-Phloem Transfer of Organic Nitrogen in Young Soybean Plants**—Maria C. Da Silva and Barry J. Shelp*

802 **Immunogold Localization of Ribulose-1,5-Bisphosphate Carboxylase with Reference to Pyrenoid Morphology in Chloroplasts of Synchronized *Euglena gracilis* Cells**—Tetsuaki Osafune*, Akiho Yokota, Shuji Sumida, and Eiji Hase

809 **Activities, Occurrence, and Localization of Hydrogenase in Free-Living and Symbiotic *Frankia***—Anita Sellstedt* and Peter Lindblad

816 **The Enzymatic Synthesis of Rubber Polymer in *Parthenium argentatum* Gray**—Chaucer R. Benedict*, S. Madhavan, Gerald A. Greenblatt, K. V. Venkatachalam, and Michael A. Foster

822 **Red Light Regulates Calcium-Activated Potassium Channels in *Mougeotia* Plasma Membrane**—Roger R. Lew, Bruce S. Serlin*, Charles L. Schauf, and Marsha E. Stockton

831 **Calcium Activation of *Mougeotia* Potassium Channels**—Roger R. Lew, Bruce S. Serlin*, Charles L. Schauf, and Marsha E. Stockton

837 **Interorgan Translocation of 1-Aminocyclopropane-1-Carboxylic Acid and Ethylene Coordinates Senescence in Emasculated *Cymbidium* Flowers**—Ernst J. Woltering

COMMUNICATIONS

846 **Oxidation *versus* Reductive Detoxification of SO_2 by Chloroplasts**—Rosella Ghisi, Andreas P. M. Dittrich, and Ulrich Heber*

850 **Effect of Ca^{2+} and Calmodulin on ΔpH Formation in Tonoplast Vesicles from Corn Roots**—Uri S. Ladror* and Raymond E. Zielinski

855 **Responses of Transpiration and Hydraulic Conductance to Root Temperature in Nitrogen- and Phosphorus-Deficient Cotton Seedlings**—John W. Radin

858 **A Second Locus, *Ixr* B1 in *Arabidopsis thaliana*, that Confers Resistance to the Herbicide Isoxaben**—Dale R. Heim, Jean L. Roberts, Philip D. Pike, and Ignacio M. Larrinua*

862 **Nitrite Photoreduction *in Vivo* Is Inhibited by Oxygen**—J. Michael Robinson

866 **Corrections**

Number 4. April

REVIEW

867 **Inhibition of Ribulose 1,5-Bisphosphate Carboxylase/Oxygenase by 2-Carboxyarabinitol-1-Phosphate**—Jerome C. Servaites

ARTICLES

871 **Sealed Inside-Out and Right-Side-Out Plasma Membrane Vesicles. Optimal Conditions for Formation and Separation**—Michael Gjedde Palmgren, Per Askerlund, Karin Fredrikson, Susanne Widell, Marianne Sommarin, and Christer Larsson*

881 **Molecular Characterization of the *Brittle-2* Gene Effect on Maize Endosperm ADPglucose Pyrophosphorylase Subunits**—Jack Preiss*, Stephanie Danner, Peter S. Summers, Matthew Morell, Carolyn R. Barton, Limei Yang, and Matthew Nieder

886 **Ca^{2+} Requirement for Aerobic Nitrogen Fixation by Heterocystous Blue-Green Algae**—Herminia Rodríguez, Joaquín Rivas*, Miguel G. Guerrero, and Manuel Losada

891 **Adaptation of the Photosynthetic Apparatus to Irradiance in *Dunaliella tertiolecta*. A Kinetic Study**—Assaf Sukenik, John Bennett, Anne Mortain-Bertrand, and Paul G. Falkowski*

899 **Expression and Processing of an *Arabidopsis* 2S Albumin in Transgenic Tobacco**—Ann De Clercq, Martine Vendewiele, Riet De Rycke, Jozef Van Damme, Marc Van Montagu, Enno Krebbers, and Joël Vandekerckhove*

908 **Fe Uptake Mechanism in Fe-Efficient Cucumber Roots**—Graziano Zocchi and Sergio Cocucci*

912 **Inverse Relationship between Polyamine Levels and the Degree of Phenotypic Alteration Induced by the Root-Inducing, Left-Hand Transferred DNA from *Agrobacterium rhizogenes***—J. Martin-Tanguy, D. Tepfer*, M. Paynot, D. Burtin, L. Heisler, and C. Martin

919 **Biochemical Similarities between Soluble and Membrane-Bound Calcium-Dependent Protein Kinases of Barley**—Leszek J. Klimczak* and Geoffrey Hind

924 **Feruloylputrescine and Caffeoylputrescine Are Not Involved in Growth and Floral Bud Formation of Stem Explants from *Nicotiana tabacum* L. var Xanthi nc.**—Markus Wyss-Benz, Luc Streit, and Edith Ebert*

931 **Cell-Wall Carbohydrates of the Endosperm of the Seed of *Gleditsia triacanthos***—Adriana E. Manzi, Elena Ancibor, and Alberto S. Cerezo*

939 **Chloroplast and Mitochondrial DNA Polymerases from Cultured Soybean Cells**—Sabine Heinhorst*, Gordon C. Cannon, and Arthur Weissbach

946 **Modulation of Host Gene Expression during Initiation and Early Growth of Nodules in Cowpea, *Vigna unguiculata* (L.) Walp.**—Arthur T. Trese* and Steven G. Pueppke

954 **Triazine Resistance in *Senecio vulgaris* Parental and Nearly Isonuclear Backcrossed Biotypes Is Correlated with Reduced Productivity**—William B. McCloskey and Jodie S. Holt*

963 **Regulation of Expression of Carbon-Assimilating Enzymes by Nitrogen in Maize Leaf**—Bambang Sugiharto, Kazuya Miyata, Hitoshi Nakamoto, Hideo Sasakawa, and Tatsuo Sugiyama*

970 **Induction of an Extracellular Ribonuclease in Cultured Tomato Cells upon Phosphate Starvation**—Thorsten Nürnberger, Steffen Abel, Wolfgang Jost, and Konrad Glund*

977 **Increases in Phosphorus Requirements for CO_2-Enriched Pine Species**—Jann P. Conroy*, Paul J. Milham, Malcolm L. Reed, and Edward W. Barlow

983 **Development and Partial Characterization of Nearly Isogenic Pea Lines (*Pisum sativum* L.) that Alter Uptake Hydrogenase Activity in Symbiotic *Rhizobium***—Donald A. Phillips*, Yoram Kapulnik, Eulogio J. Bedmar, and Cecillia M. Joseph

990 **Sugar Metabolism in Developing Kernels of Starch-Deficient Endosperm Mutants of Maize**—Douglas C. Doehlert* and Tsung Min Kuo

995 **Implication of Pectic Components in Cell Surface Interactions between Tomato Root Cells and *Fusarium oxysporum* f. sp. *radicis-lycopersici*. A Cytochemical Study by Means of a Lectin with Polygalacturonic Acid-Binding Specificity**—Nicole Benhamou*, Hélene Chamberland, and Fernand J. Pauzé

1004 **Altered Phytochrome Regulation of Greening in an *aurea* Mutant of Tomato**—Shifra Ken-Dror and Benjamin A. Horwitz*

1009 **Metabolism of Tryptophan and Tryptophan Analogs by *Rhizobium meliloti***—Myron N. V. Williams and Ethan R. Signer*

1014 **Detection of Kestoses and Kestose-Related Oligosaccharides in Extracts of *Festuca arundinacea*, *Dactylis glomerata* L., and *Asparagus officinalis* L. Root Cultures and Invertase by ^{13}C and ^{1}H Nuclear Magnetic Resonance Spectroscopy**—Kathlene L. Forsythe, Milton S. Feather*, Hanna Gracz, and Tuck C. Wong

1021 **Root Hypoxia Reduces Leaf Growth. Role of Factors in the Transpiration Stream**—Barbara A. Smit*, Dawn S. Neuman, and Matthew L. Stachowiak

1029 **Water Relations of Seed Development and Germination in Muskmelon (*Cucumis melo* L.). III. Sensitivity of Germination to Water Potential and Abscisic Acid during Development**—Gregory E. Welbaum, Tahar Tissaoui, and Kent J. Bradford*

1038 **Water Relations of Seed Development and Germination in Muskmelon (*Cucumis melo* L.). IV. Characteristics of the Perisperm during Seed Development**—Gregory E. Welbaum and Kent J. Bradford*

1046 **Water Relations of Seed Development and Germination in Muskmelon (*Cucumis melo* L.). V. Water Relations of Imbibition and Germination**—Gregory

E. Welbaum and Kent J. Bradford*

1053 **Light Energy Dissipation under Water Stress Conditions. Contribution of Reassimilation and Evidence for Additional Processes**—Thomas Stuhlfauth, Ralph Scheuermann, and Heinrich P. Fock*

1062 **Temperature-Induced Changes in the Fatty Acid Composition of the Cyanobacterium, *Synechocystis* PCC6803**—Hajime Wada and Norio Murata*

1070 **Changes in the Level of Peptidase Activities in Pea Ovaries during Senescence and Fruit Set Induced by Gibberellic Acid**—Pedro Carrasco* and Juan Carbonell

1075 **Developmental Stages of Cucumber Seedlings. Kinetics of Chlorophyll Accumulation and Other Growth Parameters**—Rami Moran, Leo P. Vernon*, Dan Porath, and Tova Arzee

1081 **A Mutation Causing Imidazolinone Resistance Maps to the *Csr1* Locus of *Arabidopsis thaliana***—George W. Haughn* and Christopher R. Somerville

1086 **Subcellular Localization of Cadmium and Cadmium-Binding Peptides in Tobacco Leaves. Implication of a Transport Function for Cadmium-Binding Peptides**—Regina Vögeli-Lange and George J. Wagner*

1094 **Gibberellins and Stem Growth as Related to Photoperiod in *Silene armeria* L.**—Manuel Talon and Jan A. D. Zeevaart*

1101 **Mechanism of Nitrogenase Inhibition in Soybean Nodules. Pulse-Modulated Spectroscopy Indicates that Nitrogenase Activity Is Limited by O_2**—David B. Layzell*, Stephen Hunt, and Gerald R. Palmer

1108 **Subcellular Localization of Chitinase and of Its Potential Substrate in Tomato Root Tissues Infected by *Fusarium oxysporum* f. sp. *radicis-lycopersici***—Nicole Benhamou*, Matthieu H. A. J. Joosten, and Pierre J. G. M. De Wit

1121 **Uptake and Accumulation of the Herbicide Bentazon by Cultured Plant Cells**—Tracy M. Sterling*, Nelson E. Balke, and Daniel S. Silverman

1128 **Potassium-Dependent Changes in the Expression of Membrane-Associated Proteins in Barley Roots. I. Correlations with K^+($^{86}Rb^+$) Influx and Root K^+ Concentration**—Mala Fernando, Jerzy Kulpa, M. Yaeesh Siddiqi, and Anthony D. M. Glass*

1133 **Heat Shock Proteins Are Not Required for the Degradation of α-Amylase mRNA and the Delamellation of Endoplasmic Reticulum in Heat-Stressed Barley Aleurone Cells**—Mark R. Brodl, Faith C. Belanger, and Tuan-hua David Ho*

1142 **Nitrogen Fixation of Nodulation Mutants of Soybean as Affected by Nitrate**—Shenchuan Wu and James E. Harper*

1148 **Flavonoid Accumulation Is Correlated with Adventitious Roots Formation in *Eucalyptus gunnii* Hook Micropropagated through Axillary Bud Stimulation**—Paolo Curir, Christian F.VanSumere, Agostino Termini, Philippe Barthe, Augusto Marchesini, and Marcello Dolci*

1154 **Characterization of α-Amylase from Shoots and Cotyledons of Pea (*Pisum sativum* L.) Seedlings**—Eric P. Beers and Stanley H. Duke*

1164 **Involvement of Endogenous Abscisic Acid in Onset and Release of *Helianthus annuus* Embryo Dormancy**—Marie-Thérèse Le Page-Degivry*, Philippe Barthe, and Ginette Garello

1169 **Sodium Stimulates Growth of *Panicum coloratum* through Enhanced Photosynthesis**—Tōru Matoh* and Shinji Murata

1174 **Changes in Protein Synthesis upon Cytokinin-Mediated Adventitious Bud Induction and during Seedling Development in Norway Spruce, *Picea abies***—Priska Stabel, Tage Eriksson, and Peter Engström*

1184 **Photosynthesis and Chlorophyll Fluorescence Characteristics in Relationship to Changes in Pigment and Element Composition of Leaves of *Platanus occidentalis* L. during Autumnal Leaf Senescence**—William W. Adams III*, Klaus Winter, Ulrich Schreiber, and Peter Schramel

1191 **Interaction between Light Quality and Light Quantity in the Photoregulation of Anthocyanin Production**—Alberto L. Mancinelli

1196 **Activation of a Reserve Pool of Photosystem II in *Chlamydomonas reinhardtii* Counteracts Photoinhibition**—Patrick J. Neale* and Anastasios Melis

1205 **Immunological Characterization of Plant Ornithine Transcarbamylases**—Robert D. Slocum*, Cynthia L. Williamson, Carola A. Poggenburg, and Michael A. Lynes

1211 **Genetic Variation for Gas Exchange Rates in Grain Sorghum**—Saranga P. Kidambi, Daniel R. Krieg*, and Darrell T. Rosenow

1215 **Characteristics of Ribulose-1,5-Bisphosphate Carboxylase/Oxygenase Degradation by Lysates of Mechanically Isolated Chloroplasts from Wheat Leaves**—Kenji Miyadai, Tadahiko Mae*, Amane Makino, and Kunihiko Ojima

1220 **Selection and Characterization of Sethoxydim-Tolerant Maize Tissue Cultures**—William B. Parker, David A. Somers*, Donald L. Wyse, Robin A. Keith, James D. Burton, John W. Gronwald, and Burle G. Gengenbach

1226 **Extended Host Range of *Agrobacterium tumefaciens* in the Genus *Pinus***—Anne-Marie Stomp*, Carol Loopstra, W. Scott Chilton, Ronald R. Sederoff, and Larry W. Moore

1233 **Chloramphenicol Stimulates the Accumulation of Light-Harvesting Chlorophyll *a/b* Protein II by Affecting Posttranscriptional Events in the Chlorina CD3 Mutant Wheat**—Kim Mogen, John Eide, Murray Duysen*, and Ken Eskins

COMMUNICATIONS

1241 **ChrA Is a Carotenoid-Binding Protein in Chromoplasts of *Capsicum annuum***—Miguel Cervantes-Cervantes, Nouréddine Hadjeb, Lee A. Newman, and Carl A. Price*

1244 **Differences in Proteins Synthesized in Needles of Unshaded and Shaded *Pinus ponderosa* var *scopulorum* Seedlings during Prolonged Drought**—Nan C. Vance*, Donald O. Copes, and Joe B. Zaerr

Volume Contents by Subject

METABOLISM AND ENZYMOLOGY

41 **Properties and Activity Changes of Chlorogenic Acid:Glucaric Acid Caffeoyltransferase from Tomato (*Lycopersicon esculentum*)**—Dieter Strack* and Wiltrud Gross

66 **Kinetic and Structural Properties of NADP-Malic Enzyme from Sugarcane Leaves**—Alberto A. Iglesias* and Carlos S. Andreo

73 **Purification and Characterization of Acetyl-CoA Carboxylase from the Diatom *Cyclotella cryptica***—Paul G. Roessler

79 **Estimation of Carbon and Nitrogen Allocation during Stalk Elongation by ^{13}C and ^{15}N Tracing in *Zea mays* L.**—Jean-Bernard Cliquet*, Eliane Deléens, Agnès Bousser, Michel Martin, Jean-Charles Lescure, Jean-Louis Prioul, André Mariotti, and Jean-François Morot-Gaudry

88 **Identification of the Large Subunit of Ribulose 1,5-Bisphosphate Carboxylase/Oxygenase as a Substrate for Transglutaminase in *Medicago sativa* L. (Alfalfa)**—Stephen A. Margosiak, Abdi Dharma, Megan R. Bruce-Carver, Andrea P. Gonzales, Donna Louie, and Glenn D. Kuehn*

110 **A Novel Role for Light in the Activation of Ribulosebisphosphate Carboxylase/Oxygenase**—William J. Campbell and William L. Ogren*

147 **Activation of O_2 Uptake and NAD-Specific Isocitrate Dehydrogenase in Mitochondria Isolated from Cotyledons of Castor Bean by *cis,trans*-Abscisic Acid**—Takafumi Tezuka*, Yukio Yamamoto, and Noriaki Kondo

155 **Characterization of ATP-Dependent Fructose 6-Phosphate 1-Phosphotransferase Isozymes from Leaf and Endosperm Tissues of *Ricinus communis***—Vicki L. Knowles, Maureen F. Greyson, and David T. Dennis*

160 **Nitrogen-Induced Changes in the Growth and Metabolism of Developing Maize Kernels Grown *in Vitro***—George W. Singletary and Frederick E. Below*

168 **Developmental Transition from Enzymatic to Acid Hydrolysis of Sucrose in Acid Limes (*Citrus aurantifolia*)**—Ed Echeverria

172 **Regulation of 5-Aminolevulinic Acid (ALA) Synthesis in Developing Chloroplasts. III. Evidence for Functional Heterogeneity of the ALA Pool**—Laiqiang Huang and Paul A. Castelfranco*

186 **Inheritance of the Reversal of O_2 Response of Photosynthesis in a *Flaveria linearis* Mutant**—Joseph H. Bouton, R. Harold Brown*, George T. Byrd, and Thomas D. Sharkey

222 **Free Amino Acid Composition of Leaf Exudates and Phloem Sap. A Comparative Study in Oats and Barley**—Jens Weibull*, Fredrik Ronquist, and Sture Brishammar

234 **Selective Measurement of Starch Synthesizing Enzymes in Permeabilized Potato Tuber Slices**—Anne S. Ponstein*, Greetje H. Vos-Scheperkeuter, Evert Jacobsen, Will J. Feenstra, and Bernard Witholt

246 **Rubisco Activity in Guard Cells Compared with the Solute Requirement for Stomatal Opening**—Udo Reckmann, Renate Scheibe, and Klaus Raschke*

265 **A Squared Michaelis-Menten Function of Substrate Concentration for Plant Mitochondrial Respiration**—Alan T. James, Joseph T. Wiskich*, and Ian B. Dry

346 **Developmental Regulation of Enzymes of Sucrose and Hexose Metabolism in Effective and Ineffective Soybean Nodules**—Gordon E. Anthon and David W. Emerich*

352 **Further Studies on O_2-Resistant Photosynthesis and Photorespiration in a Tobacco Mutant with Enhanced Catalase Activity**—Israel Zelitch

381 **Characteristics of the Inhibition of Potato (*Solanum tuberosum*) Invertase by an Endogenous Proteinaceous Inhibitor in Potatoes**—Geracimo E. Bracho and John R. Whitaker*

386 **Purification and Partial Characterization of Potato (*Solanum tuberosum*) Invertase and Its Endogenous Proteinaceous Inhibitor**—Geracimo E. Bracho and John R. Whitaker*

395 **Immunological Characterization of *in Vitro* Forms of Homoserine Dehydrogenase from Carrot Suspension Cultures**—Frank J. Turano, Ramon L. Jordan, and Benjamin F. Matthews*

408 **Photosynthetic Potential and Accumulation of Assimilates in the Developing Chloroembryos of *Cyamopsis tetragonoloba* (L.) Taub**—P. Kaladharan and M. Vivekanandan*

413 **Inhibition of Cell Wall-Associated Enzymes *in Vitro* and *in Vivo* with Sugar Analogs**—Gerald Nagahashi*, Shu-I Tu, George Fleet, and Sun K. Namgoong

427 **Changes in the Composition and Synthesis of Proteins in Cellular Membranes of *Echinochloa crus-galli* (L). Beauv. Seeds during the Transition from Dormancy to Germination**—Liliana Di Nola*, Charles F. Mischke, and Ray B. Taylorson

440 **Stress Responses in Alfalfa (*Medicago sativa* L.). I. Induction of Phenylpropanoid Biosynthesis and Hydrolytic Enzymes in Elicitor-Treated Cell Suspension Cultures**—Karen Dalkin, Robert Edwards, Brent Edington, and Richard A. Dixon*

447 **Stress Responses in Alfalfa (*Medicago sativa* L.). II. Purification, Characterization, and Induction of Phenylalanine Ammonia-Lyase Isoforms from Elicitor-Treated Cell Suspension Cultures**—Jesus Jorrin and Richard A. Dixon*

467 **Induction of Glutathione *S*-Transferase Isozymes in Sorghum by Herbicide Antidotes**—John V. Dean, John W. Gronwald*, and Charlotte V. Eberlein

480 **Transient Responses of Nitrogenase to Acetylene and**

* Author to whom correspondence should be addressed.

Oxygen in Actinorhizal Nodules and Cultured *Frankia*—Warwick B. Silvester and Lawrence J. Winship*

520 **Tobacco Mesophyll Protoplasts Synthesize 1,3-β-Glucanase, Chitinases and "Osmotins" during *in Vitro* Culture**—Jean Grosset, Yves Meyer*, Yvette Chartier, Serge Kauffmann, Michel Legrand, and Bernard Fritig

528 **Potential Importance of Metal-Ligand Interactions in Enzyme Assays Demonstrated with the Assay Cocktail for Phospho*enol*pyruvate Carboxylase**—William H. Outlaw, Jr.

534 **Carbon Isotope Discrimination Varies Genetically in C_4 Species**—Kerry T. Hubick*, Graeme L. Hammer, Graham D. Farquhar, Len J. Wade, Susanne von Caemmerer, and Sally A. Henderson

543 **A Two-Dimensional Vibrating Probe Study of Currents around Lateral Roots of *Raphanus sativus* Developing in Culture**—Keerti S. Rathore*, Kevin B. Hotary, and Kenneth R. Robinson

547 **Polyamine Levels and Tomato Fruit Development: Possible Interaction with Ethylene**—Robert A. Saftner* and Bruce G. Baldi

587 **Purification and Characterization of Aspartate Aminotransferase Isoenzymes from Carrot Suspension Cultures**—Frank J. Turano, Barbara J. Wilson, and Benjamin F. Matthews*

614 **Purification and Characterization of Pea Epicotyl β-Amylase**—Pauline A. Lizotte, Cynthia A. Henson*, and Stanley H. Duke

621 **Two Systems for Concentrating CO_2 and Bicarbonate during Photosynthesis by *Scenedesmus***—Jens Thielmann, N. Edward Tolbert*, Arun Goyal, and Horst Senger

630 **Salicylhydroxamic Acid (SHAM) Inhibition of the Dissolved Inorganic Carbon Concentrating Process in Unicellular Green Algae**—Arun Goyal* and N. Edward Tolbert

637 **Subcellular Compartmentation of Uridine Nucleotides and Nucleoside-5′-Diphosphate Kinase in Leaves**—Jane Dancer, H. Ekkehard Neuhaus, and Mark Stitt*

659 **Biochemical and Immunological Characterization of Nitrate Reductase Deficient *nia* Mutants of *Nicotiana plumbaginifolia***—Isabelle Chérel*, Martine Gonneau, Christian Meyer, Frédérique Pelsy, and Michel Caboche

679 **Purification and Partial Characterization of a Fructanase which Hydrolyzes Natural Polysaccharides from Sugarcane Juice**—M. Estrella Legaz*, Luisa Martin, Mercedes M. Pedrosa, Carlos Vicente, Roberto de Armas, Maritza Martínez, Isabel Medina, and Carlos W. Rodriguez

684 **On The Regulation of Spinach Nitrate Reductase**—Juan Sanchez* and Hans W. Heldt

703 **Characterization of α-Amylase-Inhibitor, a Lectin-Like Protein in the Seeds of *Phaseolus vulgaris***—Joaquin Moreno, Teresa Altabella, and Maarten J. Chrispeels*

710 **Purification by Immunoadsorption and Immunochemical Properties of NADP-Dependent Malic Enzymes from Leaves of C_3, C_4, and Crassulacean Acid Metabolism Plants**—Marion Fathi and Claus Schnarrenberger*

767 **Fructan Precipitation from a Water/Ethanol Extract of Oats and Barley**—David P. Livingston III

785 **Differential Regulation of Maize Homoserine Dehydrogenase under Physiological Conditions**—John K. Bryan

797 **Xylem-to-Phloem Transfer of Organic Nitrogen in Young Soybean Plants**—Maria C. Da Silva and Barry J. Shelp*

858 **A Second Locus, *Ixr* B1 in *Arabidopsis thaliana*, that Confers Resistance to the Herbicide Isoxaben**—Dale R. Heim, Jean L. Roberts, Philip D. Pike, and Ignacio M. Larrinua*

862 **Nitrite Photoreduction *in Vivo* Is Inhibited by Oxygen**—J. Michael Robinson

867 **Inhibition of Ribulose 1,5-Bisphosphate Carboxylase/Oxygenase by 2-Carboxyarabinitol-1-Phosphate**—Jerome C. Servaites

886 **Ca^{2+} Requirement for Aerobic Nitrogen Fixation by Heterocystous Blue-Green Algae**—Herminia Rodríguez, Joaquín Rivas*, Miguel G. Guerrero, and Manuel Losada

919 **Biochemical Similarities between Soluble and Membrane-Bound Calcium-Dependent Protein Kinases of Barley**—Leszek J. Klimczak* and Geoffrey Hind

990 **Sugar Metabolism in Developing Kernels of Starch-Deficient Endosperm Mutants of Maize**—Douglas C. Doehlert* and Tsung Min Kuo

1081 **A Mutation Causing Imidazolinone Resistance Maps to the *Csr1* Locus of *Arabidopsis thaliana***—George W. Haughn* and Christopher R. Somerville

1154 **Characterization of α-Amylase from Shoots and Cotyledons of Pea (*Pisum sativum* L.) Seedlings**—Eric P. Beers and Stanley H. Duke*

1205 **Immunological Characterization of Plant Ornithine Transcarbamylases**—Robert D. Slocum*, Cynthia L. Williamson, Carola A. Poggenburg, and Michael A. Lynes

1215 **Characteristics of Ribulose-1,5-Bisphosphate Carboxylase/Oxygenase Degradation by Lysates of Mechanically Isolated Chloroplasts from Wheat Leaves**—Kenji Miyadai, Tadahiko Mae*, Amane Makino, and Kunihiko Ojima

1220 **Selection and Characterization of Sethoxydim-Tolerant Maize Tissue Cultures**—William B. Parker, David A. Somers*, Donald L. Wyse, Robin A. Keith, James D. Burton, John W. Gronwald, and Burle G. Gengenbach

MOLECULAR BIOLOGY AND GENE REGULATION

1 **Codon Usage in Higher Plants, Green Algae, and Cyanobacteria**—Wilbur H. Campbell* and G. Gowri

37 **Spinach Chloroplastic Carbonic Anhydrase. Nucleotide Sequence Analysis of cDNA**—James N. Burnell*, Mark J. Gibbs, and John G. Mason

136 **Variations in the Levels of Chloroplast tRNAs and Aminoacyl-tRNA Synthetases in Senescing Leaves of *Phaseolus vulgaris***—Chelliah Jayabaskaran, Marcel Kuntz, Pierre Guillemaut, and Jacques-Henry Weil*

151 **Energy Requirement for the Import of Protein into Plastids from Developing Endosperm of *Ricinus communis* L.**—Sheila A. Boyle, Sean M. Hemmingsen, and David T. Dennis*

191 **New Methods for Extraction and Quantitation of Zeins Reveal a High Content of γ-Zein in Modified *opaque-2* Maize**—John C. Wallace, Mauricio A Lopes, Edilson Paiva, and Brian A. Larkins*

334 **Transient Gene Expression in Maize, Rice, and Wheat Cells Using an Airgun Apparatus**—James H. Oard*, David F. Paige, John A. Simmonds, and Thomas M. Gradziel

375 **The Distribution of Catalase Activity, Isozyme Protein, and Transcript in the Tissues of the Developing Maize Seedling**—Margaret G. Redinbaugh, Mara Sabre, and John G. Scandalios*

401 **The Anaerobic Response of Soybean**—Douglas A. Russell, Daphne M.-L. Wong, and Martin M. Sachs*

434 **Intact Plastids Are Required for Nitrate- and Light-Induced Accumulation of Nitrate Reductase Activity and mRNA in Squash Cotyledons**—Rolf Oemüller and Winslow R. Briggs*

456 **Inhibition of Phospho*enol*pyruvate Carboxylase by Malate**—Randolph T. Wedding*, M. Kay Black, and Christopher R. Meyer

500 **Chloramphenicol Acetyl Transferase (CAT) Protein is Expressed in Transgenic Tobacco in Field Tests following Attack by Insects**—Robert W. Thornburg*, Andrea Kernan, and Lisa Molin

538 **Globulin Gene Expression in Embryos of Maize *viviparous* Mutants. Evidence for Regulation of the *Glb1* Gene by Abscisic Acid**—Alan L. Kriz*, Mark S. Wallace, and Renato Paiva

881 **Molecular Characterization of the *Brittle-2* Gene Effect on Maize Endosperm ADPglucose Pyrophosphorylase Subunits**—Jack Preiss*, Stephanie Danner, Peter S. Summers, Matthew Morell, Carolyn R. Barton, Limei Yang, and Matthew Nieder

899 **Expression and Processing of an *Arabidopsis* 2S Albumin in Transgenic Tobacco**—Ann De Clercq, Martine Vendewiele, Riet De Rycke, Jozef Van Damme, Marc Van Montagu, Enno Krebbers, and Joël Vandekerckhove*

939 **Chloroplast and Mitochondrial DNA Polymerases from Cultured Soybean Cells**—Sabine Heinhorst*, Gordon C. Cannon, and Arthur Weissbach

1233 **Chloramphenicol Stimulates the Accumulation of Light-Harvesting Chlorophyll *a/b* Protein II by Affecting Posttranscriptional Events in the Chlorina CD3 Mutant Wheat**—Kim Mogen, John Eide, Murray Duysen*, and Ken Eskins

1241 **ChrA Is a Carotenoid-Binding Protein in Chromoplasts of *Capsicum annuum***—Miguel Cervantes-Cervantes, Nouréddine Hadjeb, Lee A. Newman, and Carl A. Price*

ENVIRONMENTAL AND STRESS PHYSIOLOGY

12 **Comparison of Lodging Safety Factor of Untreated and Succinic Acid 2,2-Dimethylhydrazide-Treated Shoots of Mulberry Tree**—Masaki Tateno* and Kaesun Bae

17 **Accumulation of Apoplastic Iron in Plant Roots. A Factor in the Resistance of Soybeans to Iron-Deficiency Induced Chlorosis?**—Nancy Longnecker* and Ross M. Welch

29 **Leaf Phosphate Status, Photosynthesis, and Carbon Partitioning in Sugar Beet. III. Diurnal Changes in Carbon Partitioning and Carbon Export**—I. Madhusudana Rao, Arthur L. Fredeen, and Norman Terry*

48 **Characterization of Abscisic Acid-Induced Ethylene Production in Citrus Leaf and Tomato Fruit Tissues**—Joseph Riov, Eliahu Dagan, Raphael Goren*, and Shang Fa Yang

103 **Leaf Cuticles Behave as Asymmetric Membranes. Evidence from the Measurement of Diffusion Potentials**—Melvin T. Tyree*, Timothy D. Scherbatskoy, and Christopher A. Tabor

130 **Carbon Isotope Discrimination in Coffee Genotypes Grown under Limited Water Supply**—Frederick C. Meinzer*, Guillermo Goldstein, and David A. Grantz

141 **Field Study of the Interaction between Solar Ultraviolet-B Radiation and Drought on Photosynthesis and Growth in Soybean**—Joe H. Sullivan* and Alan H. Teramura

205 **Water Deficit and Abscisic Acid Cause Differential Inhibition of Shoot *versus* Root Growth in Soybean Seedlings. Analysis of Growth, Sugar Accumulation, and Gene Expression**—Robert A. Creelman*, Hugh S. Mason, Robert J. Bensen, John S. Boyer, and John E. Mullet

227 **Effect of Ethephon on Protein Degradation and the Accumulation of 'Pathogenesis-Related' (PR) Proteins in Tomato Leaf Discs**—Pablo Vera* and Vicente Conejero

268 **Nitrogenase Activity and Nodule Gas Permeability Response to Rhizospheric NH_3 in Soybean**—Larry C. Purcell and Thomas R. Sinclair*

286 **Nitrate Reduction in Response to CO_2-Limited Photosynthesis. Relationship to Carbohydrate Supply and Nitrate Reductase Activity in Maize Seedlings**—Gary M. Pace*, Richard J. Volk, and William A. Jackson

363 **Purification and Thermal Dependence of Glutathione Reductase from Two Forage Legume Species**—Saranga P. Kidambi, James R. Mahan*, and Arthur G. Matches

462 **Effect of Polyethylene Glycol Exclusion on the Water Potential of Solution-Saturated Filter Paper**—

Stuart P. Hardegree and William E. Emmerich

487 **Photoinhibition in *Vitis californica*. The Role of Temperature during High-Light Treatment**—John A. Gamon* and Robert W. Pearcy

514 **Photoinhibition Resistance in the Red Alga *Porphyra perforata*. The Role of Photoinhibition Repair**—Stephen K. Herbert

560 **Emission of Volatile Sulfur Compounds from Spruce Trees**—Heinz Rennenberg*, Beate Huber, Peter Schröder, Klaus Stahl, Werner Haunold, Hans-Walter Georgii, Stefan Slovik, and Hardy Pfanz

570 **Phycobilisome Heterogeneity in the Red Alga *Porphyra umbilicalis***—Patricia Algarra*, Jean-Claude Thomas, and Anne Mousseau

577 **Short-Term Effects of γ-Irradiation on 1-Aminocyclopropane-1-Carboxylic Acid Metabolism in Early Climacteric Cherry Tomatoes. Comparison with Wounding**—Christian Larrigaudière, Alain Latché, Jean Claude Pech, and Christian Triantaphylidès*

602 **Foliar Boron Applications Increase the Final Number of Branches and Pods on Branches of Field-Grown Soybeans**—Mary K. Schon and Dale G. Blevins*

608 **Effects of Water Vapor Pressure Deficit on Photochemical and Fluorescence Yields in Tobacco Leaf Tissue**—Richard B. Peterson

648 **Photosynthetic Decline from High Temperature Stress during Maturation of Wheat. I. Interaction with Senescence Processes**—Scott A. Harding, James A. Guikema, and Gary M. Paulsen*

654 **Photosynthetic Decline from High Temperature Stress during Maturation of Wheat. II. Interaction with Source and Sink Processes**—Scott A. Harding, James A. Guikema, and Gary M. Paulsen*

666 **Cryopreservation of Rye Protoplasts by Vitrification**—Robert Langis and Peter L. Steponkus*

696 **Senescence and Stomatal Aperture as Affected by Antibiotics in Darkness and Light**—Jonathon Park and Kenneth V. Thimann*

718 **The Formation and Distribution of Ice within Forsythia Flower Buds**—Edward N. Ashworth

733 **Correlation between the Maintenance of Photosynthesis and *in Situ* Protoplast Volume at Low Water Potentials in Droughted Wheat**—Mane Santakumari and Gerald A. Berkowitz*

740 **Ubiquitin Pool Modulation and Protein Degradation in Wheat Roots during High Temperature Stress**—David L. Ferguson, James A. Guikema, and Gary M. Paulsen*

755 **Respiration and Alternative Oxidase in Corn Seedling Tissues during Germination at Different Temperatures**—Cecil R. Stewart*, Barry A. Martin, Linda Reding, and Sharon Cerwick

761 **Seedling Growth, Mitochondrial Characteristics, and Alternative Respiratory Capacity of Corn Genotypes Differing in Cold Tolerance**—Cecil R. Stewart*, Barry A. Martin, Linda Reding, and Sharon Cerwick

837 **Interorgan Translocation of 1-Aminocyclopropane-1-Carboxylic Acid and Ethylene Coordinates Senescence in Emasculated *Cymbidium* Flowers**—Ernst J. Woltering

846 **Oxidation *versus* Reductive Detoxification of SO_2 by Chloroplasts**—Rosella Ghisi, Andreas P. M. Dittrich, and Ulrich Heber*

855 **Responses of Transpiration and Hydraulic Conductance to Root Temperature in Nitrogen- and Phosphorus-Deficient Cotton Seedlings**—John W. Radin

891 **Adaptation of the Photosynthetic Apparatus to Irradiance in *Dunaliella tertiolecta*. A Kinetic Study**—Assaf Sukenik, John Bennett, Anne Mortain-Bertrand, and Paul G. Falkowski*

908 **Fe Uptake Mechanism in Fe-Efficient Cucumber Roots**—Graziano Zocchi and Sergio Cocucci*

954 **Triazine Resistance in *Senecio vulgaris* Parental and Nearly Isonuclear Backcrossed Biotypes Is Correlated with Reduced Productivity**—William B. McCloskey and Jodie S. Holt*

963 **Regulation of Expression of Carbon-Assimilating Enzymes by Nitrogen in Maize Leaf**—Bambang Sugiharto, Kazuya Miyata, Hitoshi Nakamoto, Hideo Sasakawa, and Tatsuo Sugiyama*

970 **Induction of an Extracellular Ribonuclease in Cultured Tomato Cells upon Phosphate Starvation**—Thorsten Nürnberger, Steffen Abel, Wolfgang Jost, and Konrad Glund*

977 **Increases in Phosphorus Requirements for CO_2-Enriched Pine Species**—Jann P. Conroy*, Paul J. Milham, Malcolm L. Reed, and Edward W. Barlow

1021 **Root Hypoxia Reduces Leaf Growth. Role of Factors in the Transpiration Stream**—Barbara A. Smit*, Dawn S. Neuman, and Matthew L. Stachowiak

1053 **Light Energy Dissipation under Water Stress Conditions. Contribution of Reassimilation and Evidence for Additional Processes**—Thomas Stuhlfauth, Ralph Scheuermann, and Heinrich P. Fock*

1062 **Temperature-Induced Changes in the Fatty Acid Composition of the Cyanobacterium, *Synechocystis* PCC6803**—Hajime Wada and Norio Murata*

1086 **Subcellular Localization of Cadmium and Cadmium-Binding Peptides in Tobacco Leaves. Implication of a Transport Function for Cadmium-Binding Peptides**—Regina Vögeli-Lange and George J. Wagner*

1133 **Heat Shock Proteins Are Not Required for the Degradation of α-Amylase mRNA and the Delamellation of Endoplasmic Reticulum in Heat-Stressed Barley Aleurone Cells**—Mark R. Brodl, Faith C. Belanger, and Tuan-hua David Ho*

1169 **Sodium Stimulates Growth of *Panicum coloratum* through Enhanced Photosynthesis**—Tōru Matoh* and Shinji Murata

1184 **Photosynthesis and Chlorophyll Fluorescence Characteristics in Relationship to Changes in Pigment and Element Composition of Leaves of *Platanus occidentalis* L. during Autumnal Leaf Senescence**—William W. Adams III*, Klaus Winter, Ulrich

Schreiber, and Peter Schramel
1196 **Activation of a Reserve Pool of Photosystem II in *Chlamydomonas reinhardtii* Counteracts Photoinhibition**—Patrick J. Neale* and Anastasios Melis
1211 **Genetic Variation for Gas Exchange Rates in Grain Sorghum**—Saranga P. Kidambi, Daniel R. Krieg*, and Darrell T. Rosenow
1244 **Differences in Proteins Synthesized in Needles of Unshaded and Shaded *Pinus ponderosa* var *scopulorum* Seedlings during Prolonged Drought**—Nan C. Vance*, Donald O. Copes, and Joe B. Zaerr

DEVELOPMENT AND GROWTH REGULATION

54 **Ethylene-Enhanced Catabolism of [^{14}C]Indole-3-Acetic Acid to Indole-3-Carboxylic Acid in Citrus Leaf Tissues**—Oded Sagee, Joseph Riov, and Raphael Goren*
242 **Gibberellic Acid Regulates Cell Wall Extensibility in Wheat (*Triticum aestivum* L.)**—Geoff Keyes*, Mark E. Sorrells, and Tim L. Setter
281 **Crown Gall Disease and Hairy Root Disease. A Sledgehammer and a Tackhammer**—Stanton B. Gelvin
474 **Developmental Staging of Maize Microspores Reveals a Transition in Developing Microspore Proteins**—Patricia A. Bedinger* and Michael D. Edgerton
495 **Two Distinct Blue-Light Responses Regulate Epicotyl Elongation in Pea**—Katherine M. F. Warpeha and Lon S. Kaufman*
551 **Violaxanthin Is an Abscisic Acid Precursor in Water-Stressed Dark-Grown Bean Leaves**—Yi Li and Daniel C. Walton*
565 **Cytokinins and Flower Bud Formation *in Vitro* in Tobacco. Role of the Metabolites**—Wim M. Van der Krieken, Anton F. Croes*, Marinus J. M. Smulders, and George J. Wullems
582 **Effects of the Developmental State of the Tissue on the Competence for Flower Bud Regeneration in Pedicel Explants of Tobacco**—Marinus J. M. Smulders, Eric J. W. Visser, Wim M. Van der Krieken, Anton F. Croes*, and George J. Wullems
642 **The Tomato Fruit Cell Wall. II. Polyuronide Metabolsim in a Nonsoftening Tomato Mutant**—James L. Koch and Donald J. Nevins*
770 **Effect of Light Quality and Vernalization on Late-Flowering Mutants of *Arabidopsis thaliana***—Jose M. Martinez-Zapater and Chris R. Somerville*
777 **Uptake and Metabolism of Clomazone in Tolerant-Soybean and Susceptible-Cotton Photomixotrophic Cell Suspension Cultures**—Michael A. Norman*, Rex A. Liebl, and Jack M. Widholm
792 **Correlations between Gravitropic Curvature and Auxin Movement across Gravistimulated Roots of *Zea mays***—Linda M. Young, Michael L. Evans*, and Rainer Hertel
912 **Inverse Relationship between Polyamine Levels and the Degree of Phenotypic Alteration Induced by the Root-Inducing, Left-Hand Transferred DNA from *Agrobacterium rhizogenes***—J. Martin-Tanguy, D. Tepfer*, M. Paynot, D. Burtin, L. Heisler, and C. Martin
924 **Feruloylputrescine and Caffeoylputrescine Are Not Involved in Growth and Floral Bud Formation of Stem Explants from *Nicotiana tabacum* L. var Xanthi nc.**—Markus Wyss-Benz, Luc Streit, and Edith Ebert*
1004 **Altered Phytochrome Regulation of Greening in an *aurea* Mutant of Tomato**—Shifra Ken-Dror and Benjamin A. Horwitz*
1029 **Water Relations of Seed Development and Germination in Muskmelon (*Cucumis melo* L.). III. Sensitivity of Germination to Water Potential and Abscisic Acid during Development**—Gregory E. Welbaum, Tahar Tissaoui, and Kent J. Bradford*
1038 **Water Relations of Seed Development and Germination in Muskmelon (*Cucumis melo* L.). IV. Characteristics of the Perisperm during Seed Development**—Gregory E. Welbaum and Kent J. Bradford*
1046 **Water Relations of Seed Development and Germination in Muskmelon (*Cucumis melo* L.). V. Water Relations of Imbibition and Germination**—Gregory E. Welbaum and Kent J. Bradford*
1070 **Changes in the Level of Peptidase Activities in Pea Ovaries during Senescence and Fruit Set Induced by Gibberellic Acid**—Pedro Carrasco* and Juan Carbonell
1075 **Developmental Stages of Cucumber Seedlings. Kinetics of Chlorophyll Accumulation and Other Growth Parameters**—Rami Moran, Leo P. Vernon*, Dan Porath, and Tova Arzee
1094 **Gibberellins and Stem Growth as Related to Photoperiod in *Silene armeria* L.**—Manuel Talon and Jan A. D. Zeevaart*
1148 **Flavonoid Accumulation Is Correlated with Adventitious Roots Formation in *Eucalyptus gunnii* Hook Micropropagated through Axillary Bud Stimulation**—Paolo Curir, Christian F.VanSumere, Agostino Termini, Philippe Barthe, Augusto Marchesini, and Marcello Dolci*
1164 **Involvement of Endogenous Abscisic Acid in Onset and Release of *Helianthus annuus* Embryo Dormancy**—Marie-Thérèse Le Page-Degivry*, Philippe Barthe, and Ginette Garello
1174 **Changes in Protein Synthesis upon Cytokinin-Mediated Adventitious Bud Induction and during Seedling Development in Norway Spruce, *Picea abies***—Priska Stabel, Tage Eriksson, and Peter Engström*
1191 **Interaction between Light Quality and Light Quantity in the Photoregulation of Anthocyanin Production**—Alberto L. Mancinelli

CELLULAR AND STRUCTURAL BIOLOGY

61 **Direct Observation of Cell Wall Structure in Living Plant Tissues by Solid-State ^{13}C NMR Spectroscopy**—Michael C. Jarvis* and David C. Apperley
179 **Characterization of a Rapid, Blue Light-Mediated Change in Detectable Phosphorylation of a Plasma Membrane Protein from Etiolated Pea (*Pisum sativum* L.) Seedlings**—Timothy W. Short* and Winslow R. Briggs
197 **Solubilization of Covalently Bound Extensin from *Cap-***

sicum **Cell Walls**—Karen J. Biggs and Stephen C. Fry*

310 Inducing Gravitropic Curvature of Primary Roots of *Zea mays* cv Ageotropic—Randy Moore*, Michael L. Evans, and W. Mark Fondren

316 Structure of the Threonine-Rich Extensin from *Zea mays*—Marcia J. Kieliszewski*, Joseph F. Leykam, and Derek T. A. Lamport

327 A Chenopod Extensin Lacks Repetitive Tetrahydroxyproline Blocks—Xiong-biao Li, Marcia J. Kieliszewski, and Derek T. A. Lamport*

506 Heat Shock Inhibits α-Amylase Synthesis in Barley Aleurone without Inhibiting the Activity of Endoplasmic Reticulum Marker Enzymes—Liliane Sticher, Asok K. Biswas, Douglas S. Bush, and Russell L. Jones*

802 Immunogold Localization of Ribulose-1,5-Bisphosphate Carboxylase with Reference to Pyrenoid Morphology in Chloroplasts of Synchronized *Euglena gracilis* Cells—Tetsuaki Osafune*, Akiho Yokota, Shuji Sumida, and Eiji Hase

MICROBE-PLANT INTERACTIONS

116 Chrysoeriol and Luteolin Released from Alfalfa Seeds Induce *nod* Genes in *Rhizobium meliloti*—Ueli A. Hartwig, Carl A. Maxwell, Cecillia M. Joseph, and Donald A. Phillips*

215 Involvement of Plasma Membrane Calcium Influx in Bacterial Induction of the K^+/H^+ and Hypersensitive Responses in Tobacco—Merelee M. Atkinson*, L. Dale Keppler, Elizabeth W. Orlandi, C. Jacyn Baker, and Charles F. Mischke

262 Binding of Isolated Plant Lectin by Rhizobia during Episodes of Reduced Gravity Obtained by Parabolic Flight—Ralph L. Henry, Pat D. Green, Peter P. Wong, and James A. Guikema*

276 Differential Activation of Expression of a Suberization-Associated Anionic Peroxidase Gene in Near-Isogenic Resistant and Susceptible Tomato Lines by Elicitors of *Verticillum albo-atrum*—Royce Mohan and Pappachan E. Kolattukudy*

368 *Rhizobium meliloti* Exopolysaccharide Mutants Elicit Feedback Regulation of Nodule Formation in Alfalfa—Gustavo Caetano-Anollés, Antonio Lagares, and Wolfgang D. Bauer*

531 Circadian Rhythm of the Prokaryote *Synechococcus* sp. RF-1—Tan-Chi Huang*, Jenn Tu, Te-Jin Chow, and Tsung-Hsien Chen

595 Nitrogen Fixation (C_2H_2 Reduction) by Broad Bean (*Vicia faba* L.) Nodules and Bacteroids under Water-Restricted Conditions—Vincent Guerin, Jean-Charles Trinchant, and Jean Rigaud*

726 Effects of the Fungal Endophyte *Acremonium coenophialum* on Nitrogen Accumulation and Metabolism in Tall Fescue—Philip C. Lyons, John J. Evans, and Charles W. Bacon*

809 Activities, Occurrence, and Localization of Hydrogenase in Free-Living and Symbiotic *Frankia*—Anita Sellstedt* and Peter Lindblad

946 Modulation of Host Gene Expression during Initiation and Early Growth of Nodules in Cowpea, *Vigna unguiculata* (L.) Walp.—Arthur T. Trese* and Steven G. Pueppke

983 Development and Partial Characterization of Nearly Isogenic Pea Lines (*Pisum sativum* L.) that Alter Uptake Hydrogenase Activity in Symbiotic *Rhizobium*—Donald A. Phillips*, Yoram Kapulnik, Eulogio J. Bedmar, and Cecillia M. Joseph

995 Implication of Pectic Components in Cell Surface Interactions between Tomato Root Cells and *Fusarium oxysporum* f. sp. *radicis-lycopersici*. A Cytochemical Study by Means of a Lectin with Polygalacturonic Acid-Binding Specificity—Nicole Benhamou*, Hélene Chamberland, and Fernand J. Pauzé

1009 Metabolism of Tryptophan and Tryptophan Analogs by *Rhizobium meliloti*—Myron N. V. Williams and Ethan R. Signer*

1101 Mechanism of Nitrogenase Inhibition in Soybean Nodules. Pulse-Modulated Spectroscopy Indicates that Nitrogenase Activity Is Limited by O_2—David B. Layzell*, Stephen Hunt, and Gerald R. Palmer

1108 Subcellular Localization of Chitinase and of Its Potential Substrate in Tomato Root Tissues Infected by *Fusarium oxysporum* f. sp. *radicis-lycopersici*—Nicole Benhamou*, Matthieu H. A. J. Joosten, and Pierre J. G. M. De Wit

1142 Nitrogen Fixation of Nodulation Mutants of Soybean as Affected by Nitrate—Shenchuan Wu and James E. Harper*

1226 Extended Host Range of *Agrobacterium tumefaciens* in the Genus *Pinus*—Anne-Marie Stomp*, Carol Loopstra, W. Scott Chilton, Ronald R. Sederoff, and Larry W. Moore

MEMBRANES AND BIOENERGETICS

23 Patch Clamp Studies on Root Cell Vacuoles of a Salt-Tolerant and a Salt-Sensitive *Plantago* Species. Regulation of Channel Activity by Salt Stress—Frans J. M. Maathuis* and Hidde B. Prins

97 Inhibition of Loading of ^{14}C Assimilates by *p*-Chloromercuribenzenesulfonic Acid. Localization of the Apoplastic Pathway in *Vicia faba*—Sophie Bourquin, Jean-Louis Bonnemain*, and Serge Delrot

123 Amino Acid Transport across the Tonoplast of Vacuoles Isolated from Barley Mesophyll Protoplasts. Uptake of Alanine, Leucine, and Glutamine—Karl-Joseph Dietz*, Renate Jäger, Georg Kaiser, and Enrico Martinoia

254 Membrane Composition and Physiological Activity of Plastids from an *Oenothera* Plastome Mutator-Induced Chloroplast Mutant—Ellen M. Johnson and Barbara B. Sears*

273 Polymorphism of a Photosystem I Subunit Caused by Alloploidy in *Nicotiana*—Junichi Obokata*, Kohki Mikami, Nobuaki Hayashida, and Masahiro Sugiura

293 Inhibition of Zeaxanthin Formation and of Rapid Changes in Radiationless Energy Dissipation by Dithiothreitol in Spinach Leaves and Chloro-

plasts—Barbara Demmig-Adams*, William W. Adams III, Ulrich Heber, Spidola Neimanis, Klaus Winter, Almuth Krüger, Franz-Christian Czygan, Wolfgang Bilger, and Olle Björkman

302 **Relative Contributions of Zeaxanthin-Related and Zeaxanthin-Unrelated Types of 'High-Energy-State' Quenching of Chlorophyll Fluorescence in Spinach Leaves Exposed to Various Environmental Conditions**—William W. Adams III*, Barbara Demmig-Adams, and Klaus Winter

340 **Solubilization and Reconstitution of the Oat Root Vacuolar H^+/Ca^{2+} Exchanger**—Karen S. Schumaker* and Heven Sze

358 **Differentiation between Phycobiliprotein and Colorless Linker Polypeptides by Fluorescence in the Presence of $ZnSO_4$**—Shirley Raps

419 **Accumulation of Chlorophyll *a/b*-Binding Polypeptides in *Chlamydomonas reinhardtii y-1* in the Light or Dark at 38°C. Evidence for Proteolytic Control**—J. Kenneth Hoober*, Margaret A. Maloney, Linda R. Asbury, and Dawn B. Marks

672 **Evidence for and Subcellular Localization of a Ca-Stimulated Phospholipase D from Maize Roots**—David Brauer*, Edwin Nungesser, Robert J. Maxwell, Carol Schubert, and Shu-I Tu

690 **Spermidine Uptake by Mitochondria of *Helianthus tuberosus***—Rossella Pistocchi, Fabiana Antognoni, Nello Bagni, and Davide Zannoni*

747 **Further Characterization of the Red Beet Plasma Membrane Ca^{2+}-ATPase Using GTP as an Alternative Substrate**—Lorraine E. Williams, Sherry B. Schueler, and Donald P. Briskin*

822 **Red Light Regulates Calcium-Activated Potassium Channels in *Mougeotia* Plasma Membrane**—Roger R. Lew, Bruce S. Serlin*, Charles L. Schauf, and Marsha E. Stockton

831 **Calcium Activation of *Mougeotia* Potassium Channels**—Roger R. Lew, Bruce S. Serlin*, Charles L. Schauf, and Marsha E. Stockton

850 **Effect of Ca^{2+} and Calmodulin on ΔpH Formation in Tonoplast Vesicles from Corn Roots**—Uri S. Ladror* and Raymond E. Zielinski

871 **Sealed Inside-Out and Right-Side-Out Plasma Membrane Vesicles. Optimal Conditions for Formation and Separation**—Michael Gjedde Palmgren, Per Askerlund, Karin Fredrikson, Susanne Widell, Marianne Sommarin, and Christer Larsson*

1121 **Uptake and Accumulation of the Herbicide Bentazon by Cultured Plant Cells**—Tracy M. Sterling*, Nelson E. Balke, and Daniel S. Silverman

1128 **Potassium-Dependent Changes in the Expression of Membrane-Associated Proteins in Barley Roots. I. Correlations with K^+($^{86}Rb^+$) Influx and Root K^+ Concentration**—Mala Fernando, Jerzy Kulpa, M. Yaeesh Siddiqi, and Anthony D. M. Glass*

NATURAL PRODUCTS

816 **The Enzymatic Synthesis of Rubber Polymer in *Parthenium argentatum* Gray**—Chaucer R. Benedict*, S. Madhavan, Gerald A. Greenblatt, K. V. Venkatachalam, and Michael A. Foster

931 **Cell-Wall Carbohydrates of the Endosperm of the Seed of *Gleditsia triacanthos***—Adriana E. Manzi, Elena Ancibor, and Alberto S. Cerezo*

1014 **Detection of Kestoses and Kestose-Related Oligosaccharides in Extracts of *Festuca arundinacea*, *Dactylis glomerata* L., and *Asparagus officinalis* L. Root Cultures and Invertase by ^{13}C and ^{1}H Nuclear Magnetic Resonance Spectroscopy**—Kathlene L. Forsythe, Milton S. Feather*, Hanna Gracz, and Tuck C. Wong
